Subject: Regarding Software Engineer Position

Dear Sir/Madam,

I am writing to express my strong desire for the job opportunity with UBS Europe SE, Luxembourg. I hold a Bachelor in Computer Systems Teaching from one of the leading universities in Turkey, and recently, I graduated my master's degree in Information and Computer Sciences at the University of Luxembourg.

Being one of the leading companies in the financial services market with the worldwide presence, this position is an indispensable chance for my career growth. Moreover, the company's particular focus on digital solutions presents promising opportunities for me to apply the knowledge and experience I've gained so far.

Recently, as a part of my master's thesis, I worked with one of the local startups to solve their problems in the industry to automate manual processes using computer vision, image processing, and deep learning-based approaches. This was designed to help the company to substantially decrease the labor-intensive work, production costs as well as increased the time efficiency. Furthermore, in my prior experience with Prestij Software, I taught myself to work under high time and client pressure, since the hospitals are active institutes that should never stop. This dynamic nature of the job never scared me but served as an opportunity to challenge my knowledge and enrich my experience.

Above all, I am a very career-driven professional, and I always seek new ways to realize my potential to improve personally and professionally. In this regard, I strongly believe that my experience and knowledge can make me a valuable candidate for the role. The opportunity at your company is perfectly suits my academic background and career aspirations. In light of this, I would enjoy the chance to speak with you in case you have any questions about my personal or professional background.
